

## **Keep your teeth squeaky clean with Dentosheen!**

Are you fed up to the back teeth with tooth decay? Do you get butterflies in your tummy at the thought of going to the dreaded dentist? Well look no further than this cavity defying fluoride toothpaste. Did you know that the sugary foods get caught between your teeth? It turns to acid and begins to quickly erode your precious tooth enamel, which will eventually wear away and cause damage to your crown. This damage is called a cavity. What a real kick in the teeth that would be!

Having a sweet tooth doesn't seem like a problem but you should really try to avoid sugary foods and drinks, as these can eat away at the enamel of the tooth, causing pain and sensitivity. It is important to understand that using a pea sized amount of Dentosheen fluoride toothpaste and an electric toothbrush twice a day, for a minimum of two minutes, will help prevent cavities and tooth decay. Leaving you with a gleaming smile. Additionally, you should visit your dentist regularly so they can give you expert advice on how to keep your teeth healthy. Most dentists recommend visiting every six months.

So by following these simple steps and using the correct equipment, your smile will look a million dollars. You really will have hit the jackpot with a perfect pouting smile!
